REACH ASSESSMENT OFFICER SOUTH SUDAN

BACKGROUND ON IMPACT AND REACH

IMPACT Initiatives is a humanitarian international NGO, based in Geneva, Switzerland. The organisation manages several initiatives, including the REACH Initiative. This is a joint initiative of ACTED, IMPACT Initiatives and the UN Operational Satellite Applications Programme (UNOSAT). REACH was created in 2010 to facilitate the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The IMPACT team comprises specialists in data collection, management and analysis, GIS and remote-sensing. For more information visit: www.impact-initiatives.org

COUNTRY PROFILE

IMPACT, through its own activities, or through REACH, has been implementing programming in South Sudan since 2012. Responding to the Sudan Border Crisis, REACH initially engaged through coordinated information management support – in the form of refugee camp mapping and service provision analyses, thematic assessments, and multi-sectorial needs assessments – in Maban County, Upper Nile State and Pariang County, Unity State. IMPACT was engaged by DFID to provide a series of impact evaluations of their BRACE programming across Greater Bahr el Ghazal and Upper Nile States in 2013; a programme with run for two years, included 5 total assessments, and touched a total of more than 20,000 households. Immediately following the conflict of December 2013, REACH expanded its programming to include the IDP response, participating in Initial Rapid Needs Assessments of conflict affected areas, providing mapping and monthly service provision analyses for major IDP sites around the country, and running large-scale IDP return intentions assessments.

2016 has seen the expansions of both IMPACT and REACH programming to 9 of 10 states, spanning the refugee, IDP and development responses, and covering diverse activities such as cross-border port monitoring, assessments of hard to reach areas, flood mapping and vulnerability analysis, market monitoring and supply chain analysis, analysis of tensions and conflicts over access to natural resources.

IMPACT and REACH programming will focus on integrating ongoing assessments into a common data stream, expanding the geographic scale of activities, connecting information streams to surrounding countries that are impacted by events in South Sudan, and continuing to adopt a beneficiary-centric approach to data collection that puts that needs of affected populations, and the return of information to them, at the centre of our work.
