COUNTRY PROFILE

IMPACT has been operating in Somalia since 2012, Kenya since 2016 and has recently restarted its Ethiopian mission to respond to the ongoing crisis in Tigray. The Kenya, Somalia and Ethiopia programme uses a regional structure unlike in other countries IMPACT operates which requires an understanding of three quite different contexts.

Our work in Kenya is concentrated on the refugee camps and ensuring accurate information on humanitarian need is available for NGOs to target services effectively. This is especially critical now as the government and UNHCR have announced a roadmap to closure.

The team in Somalia is much larger and has multiple research cycles including two large scale national assessments (Joint Multi-Cluster Needs Assessment and Detailed Site Assessment) as well as a number of other smaller assessments all aimed at providing intersectoral analysis of the response. In addition there is a cash and markets team which provide third party monitoring to the largest cash consortium in Somalia and Joint Market monitoring for the Shelter, NFI and WASH clusters. This response is extremely protracted and therefore there is a focus on building the capacity of local institutions and government and durable solutions for IDPs.

In Ethiopia we have two large scale teams. One, the humanitarian situation monitoring team is responding to an immediate and acute crisis in Tigray with a focus on food security. This team aims to provide much needed information on food security and other multisectoral needs to ensure that programming can be effectively targeted and access advocated for. Our other team is working nationally to provide market monitoring analysis of the country to ensure that cash programming can be targeted effectively.
