</table>
IMPACT was created in 2010 to support aid actors in making better, more informed decisions, and in turn enhance the impact of their actions on the lives of crisis-affected communities. We believed that one of the main pathways to improving aid was through a direct engagement of these communities in aid planning and delivery. Since then, over the years, we have developed a number of practical solutions for aid actors to strengthen this engagement. Through REACH, we promote the use of evidence gathered from crisis-affected people to inform decision-making. Through AGORA, we promote direct linkages between aid actors and local communities in the design and implementation of aid at settlement level. Through PANDA, we work directly with aid actors to support them in improving their programmatic tools.

As we enter our second decade of existence, we can be proud of what we have achieved so far. As you will see in this Annual Report, IMPACT has established itself as a key provider of information and analysis in contexts of crisis. Over the course of 2021, IMPACT teams have supported evidence-based planning and community engagement in 29 countries, publishing over 2,000 information products and engaging with over 1,000 actors on the ground. Across these countries, our work has been utilised in a number of ways – from supporting yearly resource planning and prioritisation by donors and consolidated appeals, to monitoring changing humanitarian situations, market dynamics, and other factors necessary for enabling emergency response. We have also promoted direct participation by crisis-affected communities in aid delivery and recovery planning, and have supported aid actors to improve the quality of their programming from global to project-specific level.

In a context in which international aid is increasingly in need but also under scrutiny, IMPACT’s mission and unique value-add is ever-more important. In the years ahead, we will continue to fulfill our objectives of enabling the delivery of assistance according to how and when crisis-affected people need it, whilst also developing new solutions that promote fairer outcomes for people affected by emerging and ongoing global challenges. In line with our strategic plan, we will also strengthen our organisational vehicle: consolidating existing initiatives and continuing to incubate new ones, notably on migrations and climate change; continuing to improve our research methods, to become a reference of global research; redoubling on internal learning and striving for continued improvement in our work; strengthening our external engagement at global and country level; and investing in our systems and processes, to become a reference for transparency in the sector.

Finally, I would like to thank the teams working for IMPACT and its initiatives, as well as our many partners. I look forward to continuing our common journey with you in the coming years.

Luca Pupulin
Executive Director
In 2021, the WASH Severity Classification was the South Sudan WASH Cluster’s key strategic tool. It was used to shape the response in South Sudan, drive prioritization following the comprehensive analysis, and highlight the key WASH needs throughout the country.

The Cluster used the WSC as our key document for donor advocacy, and it was also used more broadly to prioritize the inter-sectoral humanitarian response in South Sudan.

South Sudan WASH Cluster

The REACH team have provided much formidable support to the JIAF project throughout 2021. At the strategic level REACH have often played a leadership role, helping guide discussions at the Steering Committee – on many occasions setting the agenda and setting the foundations for a common constructive narrative amongst JIAF stakeholders, whose views are often quite diverse.

At technical level, support has been second-to-none: REACH co-led the Methodology Working Group, as well as the tripartite management team which supported the JIAF independent review in 2021.

Esther Waters-Crane, Senior Project Manager for Joint Inter-Sectoral Analysis Framework, Project Management Unit
CRISIS-LEVEL RESPONSE PLANNING

Enabling evidence-based *inter-sectoral* coordination and planning, according to needs.

**2021 ACHIEVEMENTS**

- In addition to informing People in Need and severity of needs estimations, findings across the 17 *Multi-Sector Needs Assessments (MSNAs)* facilitated by REACH in 2021 were cited more than 1,400 times in key strategic planning documents, primarily Humanitarian Needs Overviews and Humanitarian Response Plans.

- Key contributor to the technical and strategic development of the *Joint Inter-Sectoral Analysis Framework (JIAF)*, through participating in the global Steering Committee and co-chairing the Methodology Working Group.

Enabling needs-based *sector-specific* coordination and planning, according to needs.

**2021 ACHIEVEMENTS**

- Implementation of 35 *assessments* related to Food Security, Nutrition, CCCM, WASH, Shelter, Education, and Telecommunications and technical support to 47 *country-level clusters*.

- Establishment of first-ever global baseline of the severity of WASH needs, leading the implementation of the WASH Severity Classification analysis in 20 *countries*.

- Support to Integrated Phase Classification (IPC) for Acute Food Insecurity or Acute Malnutrition in 11 *countries*, either through provision of data or participation in analysis workshops.
EMERGENCY PRIORITISATION
Triggering and informing rapid response in the event of a sudden escalation of needs.

HSM ZOOM IN
A series of attacks in Dikwa town between 19 February and early March by non-state armed groups triggered the evacuation of humanitarian actors from an area heavily dependent on life-saving assistance for food, water, and healthcare. Leveraging its HSM workstream, the REACH team in northeast Nigeria conducted a rapid assessment in Dikwa, Ajiri, and Maiduguri to better understand the current and anticipated needs. Through this assessment, REACH was able to identify reports of severely limited water access and potential deaths related to thirst, and quickly alerted donors and aid actors to mobilize a response.

PEOPLE-CENTRED ASSISTANCE
Ensuring the voices of crisis-affected populations are central to how aid is delivered.

2021 ACHIEVEMENTS
• Produced a first-ever global analysis of Accountability to Affected Populations (AAP) data, which was collected through 2020 MSNAs in 12 countries. The analysis highlights pre-existing vulnerabilities, satisfaction with aid, and preferred information and feedback channels.
• Assessment of 4,491 markets globally, through JMMI and another 30 rapid and thematic market assessments.
• Partnered with GSMA and the Emergency Telecommunications Cluster to publish the Connectivity, Needs, and Usage Assessment (CoNUA) Toolkit. The toolkit aims to guide users in collecting data about mobile phone access, usage, preferences, and digital skills.

PILOTING NEW METHODS
Cross-cutting exploration of new work streams and innovative practices to inform more effective humanitarian response.

2021 ACHIEVEMENTS
• Foundational work to develop a framework for integrating remote sensing with inter-sectoral analysis workstreams, namely MSNAs and HSM – setting the stage for pilot activities in 2022.
• Remote sensing tools and approaches were developed for key thematic areas – water supply, vegetation health, and cropland abandonment – to support bespoke Cluster and partner needs.
IMPACT Initiatives - Annual Report 2021

OUR PROGRAMMES

IMPACT is developing a diverse portfolio of solutions and approaches to enable fairer outcomes for populations affected by emerging and ongoing global challenges.

AGORA

AGORA supports the stabilisation of crisis-affected areas by strengthening local response capacities and recovery efforts.

AGORA ZOOM IN

In response to severe conflict and internal displacement issues, IMPACT supported local and international humanitarian actors in Central African Republic (CAR) and Niger to develop joint local recovery response plans in more than 20 municipalities. IMPACT facilitated a series of trainings for officials and civil servants from municipal governments in both countries, culminating in a peer-to-peer learning workshop that brought together 15 local governance actors from southeast CAR and the Diffa region in Niger.

HUMAN MOBILITY AND MIGRATION

IMPACT delivers innovative research programs that improve practices and policies on the movement of people globally.

2021 ACHIEVEMENTS

• In 2021, IMPACT focused on pivoting innovative research methodologies to access hard-to-reach migrant populations through the use of Big Data and partnerships with academia and the private sector.

• Migration expertise has been increasingly streamlined into REACH and PANDA programming through the development of migrant-specific MSNAs, Third-Party Monitoring exercises, and multi-agency needs assessments in North and West Africa and Latin America.
Through PANDA (Project Assessment and Appraisals), IMPACT directly supports key aid actors in improving the effectiveness, efficiency, and efficacy of their programmes.

**2021 ACHIEVEMENTS**

- With projects in 20 countries in 2021, PANDA expanded not only its portfolio but also its repertoire of services and donor base globally.
- In many contexts of crisis, the continued implementation of key activities such as UNHCR’s Post-Distribution Monitoring (PDM) in Iraq, as well as Third-Party Monitoring and support to FCDO’s programming in Jordan, Libya, Mali, Nigeria, and Uganda, ensured the ongoing provision of independent verification of critical life-saving humanitarian activities.

**CLIMATE AND DISASTER RESILIENCE**

IMPACT’s newest portfolio aims to increase understanding of disaster risk and inform climate change adaptation in line with the Sendai framework and Paris Agreement.

**2021 ACHIEVEMENTS**

- Previous work on flood hazards was taken to a new level with the use of sophisticated hydraulic modelling applications and very high-resolution terrain data to provide detailed information on at-risk settlements.
- Climate-related remote sensing analysis was incorporated into more products, helping to pave the way towards the mainstreaming of climate analysis.

**KEY PUBLICATION**

**Precipitation and Temperature Change in Iraq - November 2021**

In Iraq, climate change is expected to aggravate a set of cross-sectoral challenges, with current and expected implications in the Water, Sanitation, and Hygiene (WASH) sector in particular.

To support the WASH Cluster with their emergency preparedness, IMPACT conducted a preliminary analysis of the precipitation and temperature development, as key indicators of climate change.

## OUR IMPACT: SYSTEM-WIDE CHANGE

Using comparative analysis of in-camp and out-of-camp population groups assessed through the Multi-Sector Needs Assessment, the REACH team was able to highlight persisting needs of in-camp populations and the potential impact of funding gaps on service provision. Findings were shared with key camp management actors to support advocacy with international donors, the Humanitarian Country Team, and the Inter-Cluster Coordination Group.

### COUNTRY PERSPECTIVE

I went through the [Returns and Durable Solutions Assessment presentation] carefully and found it very informative. The information provided in the document reflects the situation in Al-Forat Markaz 100% including the gaps and challenges the communities face due to different obstacles.

**National Liaison Officer, Returns Working Group / Durable Solutions Technical Working Group**

---

## JORDAN

### INITIATIVES
- **REACH**
- **PANDA**

### OUR IMPACT: EVIDENCE-BASED PROGRAMMING

In 2021, IMPACT Jordan completed the second year of its third-party monitoring of UNHCR and WFP cash assistance programmes for refugees. As the two agencies adapted their programming in response to the COVID-19 pandemic, IMPACT responded to the needs of the donor and partners by designing and conducting neighbourhood-level assessments on social cohesion and the associated role of cash assistance. Within a short timeframe, IMPACT reviewed global best practices and provided indicative findings on social cohesion in selected refugee-hosting communities across Jordan, highlighting to partners how social cohesion indicators can be considered in future cash programming and monitoring.

### OUR WORK

### COUNTRY PERSPECTIVE

The assessment findings were critical to UNICEF Jordan as they did not only highlight the socio-economic situation of the families living in [informal tented settlements (ITS)] but it also helped UNICEF (and its donors) to tangibly understand the impact of UNICEF services and the criticality of continuing the services for the ITS communities.

**UNICEF Jordan**
**LEBANON**

**OUR IMPACT: SYSTEM-WIDE CHANGE**

The REACH team facilitated the first pilot Multi-Sector Needs Assessment (MSNA) in Lebanon, which contributed to informing the Emergency Operation Cell joint analysis document and the Emergency Response Plan. Notably, the MSNA data supported the calculation of the PiN for the Lebanese, Migrant, and Palestine Refugees in Lebanon population groups for the first time.

5,316 HOUSEHOLD INTERVIEWS

**OUR STAFF**
1 STAFF WORKING IN OUR PROGRAMS

---

**COUNTRY PERSPECTIVE**

The first MSNA in Lebanon, conducted in 2021, was fundamental in providing an evidence base for the update of the funding and planning for vulnerable Lebanese populations, as well as laying the groundwork for a more comprehensive understanding of needs across populations in Lebanon.

Dylan Terry, IMPACT Lebanon Country Coordinator

---

**LIBYA/TUNISIA**

**OUR IMPACT: SYSTEM-WIDE CHANGE**

Through a rapid assessment about the needs of migrants recently released from detention centres, considered to be a key information gap in the response, the REACH team highlighted the limited assistance available for this highly vulnerable population group. Assessment findings were reportedly used for advocacy with the Humanitarian Country Team regarding a coordinated response for those released from detention centres, as well as advocacy efforts related to national authorities’ migration management plans.

**OUR WORK**
21 RESEARCH PROJECTS IMPLEMENTED DURING 2021

**OUR PRODUCTS**
46 INFORMATION PRODUCTS PUBLISHED
13,185 HOUSEHOLD INTERVIEWS

**OUR STAFF**
34 STAFF WORKING IN OUR PROGRAMS

---

**COUNTRY PERSPECTIVE**

The MSNA is the life blood of information-gathering for all sectors - there is no more valuable exercise than this one when it comes to evidence generation - REACH has done a fantastic job given the circumstances in 2020 and 2021.

Humanitarian Partner, Libya

---

**SUPPORTED BY:**
The REACH team conducted the first-ever Multi-Sector Needs Assessment (MSNA) in oPt, collaborating with the Palestinian Central Bureau of Statistics to implement data collection in both the West Bank and Gaza Strip. MSNA data was one of the primary sources informing the annual Humanitarian Needs Overview (HNO) and contributed to the needs analysis of five of the seven sectors included in the HNO.

The 2022 Humanitarian Needs Overview is informed by the first-ever MSNA at the household level for the oPt. This supported the calculation of sectoral and inter-sectoral ‘People in Need’ and severity figures, as well as the identification of vulnerable population groups and geographic areas with the most acute needs.

Analysis provided in the REACH Syria Water Crisis Briefing Note from June 2021 not only provided the first comprehensive overview of the impact of the water crisis in Northeast Syria, but also directly informed a NES Forum Inter-Sector Working Group, Water Crisis Response Plan (September 2021), including a funding appeal for 333 million US Dollars.
A recent mapping exercise conducted in Yemen captured much richer information than usual for this type of study. The wealth of knowledge gained and the relationships built between Cash and Voucher Assistance (CVA) actors and Financial Service Providers is set to provide real and tangible benefits to the way CVA is delivered in Yemen in the future ... The study has shed light on the untapped opportunities of closer collaboration and work with FSPs more broadly.

IMPACT Initiatives - Annual Report 2021
### Nigeria

**Our Impact: Enabling Rapid Response**

Through its “area of knowledge” approach to conducting Humanitarian Situation Monitoring (HSM), the REACH team was able to collect critical multi-sectoral data in certain insecure and hard-to-reach areas in northeast Nigeria. This kind of information supported humanitarian actors in identifying hotspot areas with urgent needs, as well as in advocacy efforts to increase humanitarian access.

**Country Perspective**

With the implementation of the AGORA approach, through the SHIMODU project in Niger, IMPACT has been able to go beyond its usual range of activities in the humanitarian sector. By informing locally owned settlements recovery plans and providing technical assistance to local institutional actors in the Diffa region, IMPACT successfully implemented an action-research approach in a complex humanitarian context.

COUNTRY PERSPECTIVE

Your findings in the multi-sectoral needs assessments (MSNA) are vital in our protection programming, and this year, we shall drop our regular yearly participatory assessment and allow REACH MSNA data to feed into our programming, as the data is multi-sectoral and very informative, we shall only conduct focus group discusssions.

Community-based protection officer, UNHCR Dadaab
**OUR IMPACT: SYSTEM-WIDE CHANGE**

Considering the ongoing protracted crisis in Somalia and resulting resource constraints, the REACH team conducted its fifth annual Multi-Sector Needs Assessment (MSNA) in 2021, in a continued effort to inform crisis-wide decision-making processes and support prioritization of population groups with the most significant humanitarian needs.

**OUR WORK**

**OUR PRODUCTS**
- 142 INFORMATION PRODUCTS PUBLISHED
- 22,804 HOUSEHOLD INTERVIEWS
- 27 FOCUS GROUP DISCUSSIONS
- 7,238 KEY INFORMANT INTERVIEWS

**COUNTRY PERSPECTIVE**

In terms of data collection and analysis, in 2022 ... REACH will continue to support the clusters and humanitarian partners in Somalia to understand the severity of needs of the assessed population, including living standard gaps, in cluster-specific, and inter-sectoral approaches.

*Somalia 2022 Humanitarian Response Plan*

**INITIATIVES REACH**

**SOUTH SUDAN**

**OUR IMPACT: ENABLING RAPID RESPONSE**

REACH was able to feed evidence produced through a variety of data sources, including Rapid Needs Assessments (RNAs), to inform immediate scale-up of assistance and resources in critical areas of concern. For example, the Tambura RNA was reportedly used as a foundation for the ICCG/ HCT discussions on improved response in the area. Similarly, the Cuibet RNA resulted in a call for an ICCG visit and need for additional assessment, based on reported instances of hunger-related deaths.

- 13,177 HOUSEHOLD INTERVIEWS
- 478 FOCUS GROUP DISCUSSIONS
- 65,268 KEY INFORMANT INTERVIEWS

**COUNTRY PERSPECTIVE**

REACH’s work is formidable and key in program design and implementation. Timely assessments would be of great need for timely decision making and improvement of programs and hoping REACH ensures this in 2022 henceforth.

*Humanitarian Partner, South Sudan*
OUR IMPACT: INFORMING OPERATIONAL ACTORS

With few operational partners in El Geneina, West Darfur and very little information management, assessment, and analysis capacity, REACH (hosted by NRC) was able to support the Site Management Working Group through the training of NRC and partner field teams, develop and adapt assessment tools, and launch data collection through site key informant interviews. The information products and maps helped inform operational partners and raise awareness about the evolving situation and needs of the displaced.

KEY INFORMANT INTERVIEWS

OUR WORK

According to our partner NRC, the situation in Darfur was severe. Over half a million people in Sudan - mostly in Darfur - were displaced in 2021 alone. For this reason, IMPACT felt it was important to have an operational presence and support the response in displacement sites.

Alexandra Goldsack, Head of Programmes for East Africa

OUR IMPACT: INFORMING CASH-BASED RESPONSE

The IMPACT team informed the response to the resurgence of COVID-19 in Uganda through two rapid assessments that shed light on the increased needs and vulnerabilities of refugees, as well as the impact of COVID-19 on the Karamoja region, which was already affected by food insecurity and malnutrition prior to the pandemic.

UGANDA

FOCUS GROUP DISCUSSIONS

OUR WORK

Our ‘Financial Services in the Uganda Refugee Response - An Assessment of User Perspective’ report offered Uganda response actors an overview of beneficiaries’ experiences with cash assistance with respect to different delivery modalities such as mobile money, bank accounts, and vouchers. Thanks to this assessment, response actors can identify the most appropriate delivery modality, taking into account beneficiary preferences.

OUR IMPACT: SYSTEM-WIDE CHANGE

The IMPACT information management deployment helped to strengthen coordination in the Armenia response and its rapid multi-sector needs assessment provided a foundation for the inter-agency response plan. Donors went on to fund further needs assessments and contribute funding to meet immediate needs in the response plan and appeal.

UKRAINE

OUR IMPACT: SYSTEM-WIDE CHANGE

By the end of 2021, the majority of IMPACT’s funding was geared towards informing nexus or development programming – for example, socioeconomic analysis, AGORA activities, and disaster risk recovery. This shift demonstrated our ability to transition from humanitarian-focused research activities to informing development priorities as the crisis evolved.

COUNTRY PERSPECTIVE

The largest humanitarian donor in Ukraine considered REACH to be their primary trusted source of data on remaining humanitarian needs in the country.

**OUR IMPACT: SYSTEM-WIDE CHANGE**
Findings from the Joint Multi-Sector Needs Assessment (J-MSNA) were cited in the Bangladesh Joint Response Plan to highlight the severity of needs of Rohingya refugees and adjacent host communities. The findings were particularly used to advocate for mainstreaming accountability of humanitarian actors to crisis-affected people and making it a core commitment of the response strategy.

COUNTRY PERSPECTIVE

The REACH HSM is an impartial source of information in this highly polarized context where data collection is a challenge.
Paraphrased from a meeting with humanitarian donors

SUPPORTED BY:
IMPACT promotes a collaborative approach and supports established inter-agency coordination mechanisms at global and country levels. In 2021, IMPACT continued to strengthen its role in the global humanitarian system, notably through its participation in several bodies of the Inter-Agency Standing Committee as well as through its active engagement in global clusters and in Grand Bargain workstreams.

**OUR SISTER ORGANISATION**

ACTED is IMPACT’s sister organisation. ACTED hosts and facilitates IMPACT’s field operations and leads AGORA project implementation.

CODE OF CONDUCT AND POLICIES

ANTI-FRAUD, BRIBERY AND CORRUPTION POLICY
IMPACT has a no tolerance approach towards corruption and is committed to respecting the highest standards in terms of efficiency, responsibility and transparency in its activities.

CONFLICT OF INTEREST PREVENTION POLICY
To ensure the most efficient, responsible and transparent delivery of aid, IMPACT, its staff and partners commit to preventing their private interests conflicting with their duties.

ANTI-TERRORISM AND ANTI-MONEY LAUNDERING POLICY
IMPACT is committed to never knowingly support, tolerate or encourage terrorism, the activities of those who embrace terrorism and anti-money laundering activities.

CHILD PROTECTION POLICY
IMPACT commits to safeguarding children from harm within internal procedure, throughout all activities and particularly in the implementation of child protection mainstreaming within research.

POLICY AGAINST SEXUAL EXPLOITATION AND ABUSE
IMPACT adopts a zero tolerance approach towards sexual exploitation and abuse, and is thus committed to their prevention both within the organisation and within the framework of its programmes and beneficiary populations.

GRIEVANCE POLICY
IMPACT’s Grievance Policy provides a framework for professional grievances raised by staff through internal dedicated channels of reporting, and a proper response mechanism and follow-up.

DATA PROTECTION POLICY
IMPACT’s Data Protection Policy controls how personal information can be used and shared, as well as ensure the protection and confidentiality of personal and sensitive data.

ENVIRONMENTAL SAFEGUARDING POLICY
IMPACT is committed to the promotion of a 3Zero world: zero exclusion, zero carbon, zero poverty. In line with this, IMPACT is committed to good environmental stewardship in its operations and in all of its humanitarian and development programming. IMPACT commits to minimising the environmental impact of our operations.
The association of IMPACT Initiatives is governed by a General Assembly composed of six members, of whom five make up the Committee.

**THE GENERAL ASSEMBLY** is composed of six members and meets at least yearly as an Ordinary General Assembly. Extraordinary General Assemblies can be called by the Committee. The General Assembly approves the yearly Report and Accounts as well as the provisional budget of the Association. In addition to this, it decides any modifications to the statutes.

**THE COMMITTEE** is composed of administrators who are elected by the General Assembly for a period of three years. It includes five administrators, of whom one or two are renewed during the annual ordinary General Assembly. The Committee elects a President, a Secretary and Treasurer when necessary.
UNDER THE SPOTLIGHT

In 2021, IMPACT strengthened its external engagement with a range of global actors, including UN agencies, NGO partners, academic institutions, and media organisations. A few examples are highlighted below:

GLOBAL EVENTS

Head of Research Nayana Das participated on the panel, “Leaving no one behind: the need to measure equity,” at the 3rd annual UN World Data Forum in Bern, Switzerland.

IMPACT participated in a variety of events at OCHA’s annual Humanitarian Networks & Partnerships Week (HNPW), including facilitation of a session on “Improving aid localization through settlement-based interventions,” together with Shelter Cluster experts from CRS and NRC.

COLLABORATIONS WITH ACADEMIA

The report included REACH Humanitarian Situation Monitoring and the REACH-led Integrated Needs Tracking System in South Sudan as case study examples.

MEDIA REFERENCES

A November 2021 article from The Guardian about the impact of the climate crisis on flooding and food security in South Sudan cited a REACH Shocks Verification Assessment to Fangak County, one of the worst-affected areas.

NEW PARTNERSHIPS

In October 2021, REACH and the World Food Programme (WFP) signed a first-ever two-year regional Memorandum of Understanding (MoU), committing to combine resources and expertise to better serve the needs of the most vulnerable populations across West Africa.

REACH and WFP are known for the quality of their food security assessments as stand-alone agencies. Together, we will only be stronger, in strengthening national food security and market information systems in the region.
